### A Summary of my philosophy for providing care to children

**I believe in making parents and children feel welcome by creating a professional and open relationship with parents and children by creating an environment that is pleasing and comfortable.**

**My role as an educator is to provide an environment of trust, respect, happiness and honesty.**

**I value each child's self-esteem by promotion of self-help skills, being open to children's interests and using these for future programming.**

**I involve the community by using local amenities such as library, parks, play groups, networking with other carers and referral sources if needed.**

**I cater for the multicultural community by being open minded and by respecting that we all come from a different cultural background.**

**I provide a safe, clean and healthy environment, adhering to policies, encouraging healthy eating, regular maintenance and cleaning of equipment and by providing a smoke free and chemical free play areas.**
